Pro Mini-Sprayer

This new, innovative material pump is the result of an extensive design effort by J and M. It is perfect for the small to medium job that only allows minimum work space or has limited access. This compact unit is small enough to be transported in the trunk of a car. And, with its heavy-duty wheels, it is fully portable . . . suitable for room additions, home repairs or going up in an elevator to handle a high-rise building job.

Specifications:

Hopper:

18 gallon capacity - fabricated from 18 gauge stainless steel.

Frame:

Fabricated from 12 gauge steel for strength & durability.

Pump:

J and M designed 1L3 rotor and stator delivers 1-2 gallons per minute of material with easy access pump clean-out. Sealed bearings on driveshaft for maintenance free long life. Custom setups available.
